PROFILE

I am a final-year B.E. undergraduate student in Information Science and Engineering at MVJ College of Engineering, with a strong interest in software development, problem-solving, and debugging. I enjoy working with Java, AI/ML, and SQL, and applying my knowledge to develop practical solutions. A proactive learner and problem solver who enjoys taking initiative, adapting to new technologies, and contributing to team success. Seeking an opportunity to apply my technical skills, gain industry experience, and contribute to impactful projects. Outside academics, I enjoy acting, fashion and editorial modelling, playing basketball and badminton, and travelling.

EDUCATION

BE in Information Science — 2023 – Present · GPA 8.5/10
MVJ College of Engineering, Bangalore

12th (PUC) — 2023 · 89%
Mount Carmel PU College

10th (SSLC) — 2021 · 96.16%
Gulabi Girls High School

SKILLS

Languages	Java, C++, JavaScript, TypeScript, HTML, CSS, SQL, Python
Frontend	React, Next.js, Tailwind CSS
Backend & Data	FastAPI, REST APIs, SQLite, PostgreSQL, Redis
Tools	Vercel, Git, GitHub, VS Code
Soft Skills	Communication, Leadership Mindset, Problem Solving, Team Collaboration

CERTIFICATIONS

- NPTEL – Problem Solving Through Programming in Java
- Simplilearn – Cloud Computing
- JPMorganChase Software Engineering Job Simulation on Forage – May 2025

PROJECTS

ThreatLens — *Python, FastAPI, scikit-learn, SQLite, React*

• Explainable hybrid intrusion detector for network flows: a supervised model and an anomaly model score the same record, then a decision layer turns that into a priority and a reason so the investigation can be replayed.
• Built Random Forest + Isolation Forest scoring with FastAPI predict/alert/history endpoints, SQLite alert storage, and a React dashboard for overview and traffic analysis on a documented CICIDS2017 holdout. **GitHub** | **Demo**

RefMind — *React, Vite, FastAPI, IBM Granite*

• Explainable referee-decision demo for the IBM SkillsBuild AI Builders Challenge where a fan votes first, then sees the rule, camera view, and why disagreement can remain.
• Built a React/Vite frontend and FastAPI backend that grounds explanations in IFAB laws with IBM Granite tooling, including a demo path that runs without API keys. **GitHub** | **Demo**

CrimeLens AI — *Next.js, TypeScript, FastAPI, PostgreSQL, Redis*

• Decision-support console for reading incidents spatially with maps, prediction, network views, and written briefings, keeping a person in the loop before anyone acts on a score.
• Built a Next.js console and FastAPI service with PostgreSQL/PostGIS + Redis, JWT role scoping by district or station, and an English/Kannada interface. **GitHub** | **Demo**

ACHIEVEMENTS

- Top 15 at RIFT '26 Hackathon; Final Round at INCEPTRIX (Jain FET); 2nd runner-up at the Ratefluencer National Level AI Hackathon with Team ciphers_2.0
- Directed Project Expo and Tech Project Fest, coordinating logistics and showcasing student projects on campus
- 3-time college-level national short film winner with Raagabhinaya

LANGUAGE

English, Hindi, Kannada
