## PROFILE

Final-year B.E. Information Science and Engineering student at MVJ College of Engineering with keen interest in Software Development, Artificial Intelligence, and Machine Learning. Hands-on experience through academic projects, AI-based projects, and hackathons, with strong curiosity to understand technology beyond simply using it. Proactive, adaptable problem solver who enjoys learning, experimenting with new technologies, and turning ideas into practical solutions. Seeking opportunity to apply skills, learn from industry professionals, and contribute to impactful real-world projects.

## EDUCATION

**BE in Information Science** — **2023 – Present · GPA 8.5/10**
*MVJ College of Engineering, Bangalore*

**12th (PUC)** — **2023 · 89%**
*Mount Carmel PU College*

**10th (SSLC)** — **2021 · 96.16%**
*Gulabi Girls High School*

## SKILLS

| | |
|---|---|
| **Languages** | C++, Java |
| **Web** | CSS, HTML, JavaScript, React.js |
| **Core CS** | Computer Networks, Data Structures & Algorithms, OOPs, Operating Systems |
| **Tools** | Canva, GitHub, VS Code |
| **Soft Skills** | Communication, Leadership Mindset, Problem Solving, Team Collaboration |

## CERTIFICATIONS

- NPTEL – Problem Solving Through Programming in Java
- Simplilearn – Cloud Computing
- JPMorganChase Software Engineering Job Simulation on Forage – May 2025

## PROJECTS

**Fraudulent Shopping Website Detection Chrome Extension** — **2024 – Present**

- Engineered Chrome Extension that flags fraudulent shopping sites via Google Safe Browsing API so users avoid phishing before checkout
- Integrated blacklist verification that cross-checks URLs against known malicious domains to harden browsing security
- Designed responsive extension UI in HTML, CSS, and JavaScript for clear real-time threat alerts
- Applied browser APIs and web-security practices to validate detection against phishing and scam patterns

**AI-Based Intrusion Detection System** — **2025 – Present**
**GitHub | Demo**

- Built ML-based intrusion detection system on cybersecurity datasets using classification models to spot network attacks
- Analyzed anomaly-detection techniques and network attack patterns to strengthen threat identification
- Investigated NSL-KDD dataset and modern AI methods to select features for intrusion classification

## ACHIEVEMENTS

- Collaborated on **RIFT Hackathon** and **Jain International Hackathon**, delivering solutions under time pressure with teammates
- Directed **Project Expo** and **Tech Project Fest**, coordinating logistics and showcasing student projects on campus
- Produced **3 national-level short films** with **Raagabhinaya**, contributing to college cultural performances

## LANGUAGE

English, Hindi, Kannada
